

INFORMATION FOR PARENTS

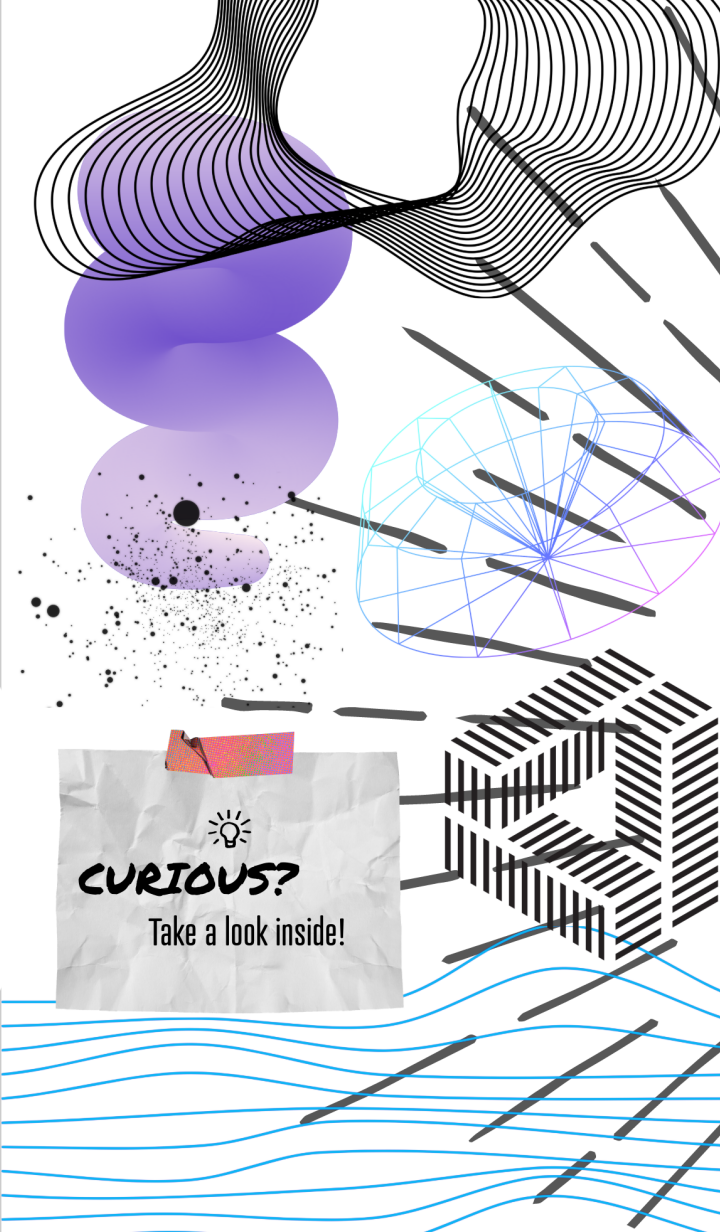

The workshop series are part of the EnvironMINT research project. We investigate how young people can be creatively excited about MINT topics (mathematics, computer science, natural sciences and technology).

We would be delighted if you would also become part of the research project!

We would be happy to inform you about how you can best support your child's activities and are very interested in your opinion!

GREEN FABLAB
KAMP-LINTFORT

WHAT IS A FABLAB?

The Green FabLab is a place where you can use 3D printers, laser cutters, vinyl plotters, laptops and much more yourself and with others.

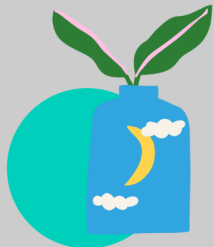

We support you, but you decide!

Would you like to design a piece of clothing individually?

Do you need a cool holder for your controller?

Do you want to program your own game or compose your own music?

How about your own decoration for your room?

Would you like to invent and build something for nature observation?

WORKSHOPS

For all children and young people aged 10 to 16

Discover the world of the Green FabLab in one of our workshop series! Here you have the opportunity to use fascinating technologies and make your own project idea come true together with others for 4 weeks!

If you took part in one of the workshop series, you can use the Green FabLab for free on Fridays in March, May and July! We will then tell you the details...

HOW MUCH DOES IT COST?

NOTHING!

Since the workshop series are part of a research project, we can offer them free of charge.

We are therefore looking forward to your opinion on the offers! With your help, we would like to further develop the offers together.

REGISTRATION

Pre-registration from parents is required for the workshop series. There are two options for this:
